Product Involved: Falcon™ X3, Elf™, Skorpio™ X3, Lynx™, Memor™, and many legacy products

Description: DCU 4.1.3.0 Release Notes

Business Unit: Mobile

Distribution Scope: ☐ Internal ☒ External – specify: **Public**

# DATALOGIC CONFIGURATION UTILITY 4.1.3.0

1. COMPATIBILITY

a. For use with both Windows Embedded Handheld (formerly Windows Mobile) and Windows CE versions of Falcon X3, Elf, Skorpio X3, Lynx, Memor, Kyman, Skorpio, Pegaso, Falcon, and J-Series devices.

b. For installation on both 32-bit and 64-bit versions of Windows XP, Windows Vista, and Windows 7.

2. ENHANCEMENTS

a. Added support for the Datalogic Lynx.

b. Added support for new DL Buttons hotkey functions.

c. Changed the company name to "Datalogic ADC."

d. Updated both Datalogic and Microsoft End User License Agreements.

e. Implemented support for the decoder's free-form prefix, suffix, and data separator functionality.

f. Implemented support for controlling the laser decoder's conditional add-on functionality.

g. Implemented support for correctly setting time zones when the language changes on multi-language UI versions of Windows CE by directly pulling the localized time zone strings from the device.

h. Implemented support for setting the locale in Regional Settings for Falcon X3, Elf, and Skorpio X3.

3. CORRECTED DEFECTS

a. Fixed a memory overwrite that caused intermittent crashes because of a cross-thread access exception. (DCU 3)

b. Fixed the "Enable address bar" checkbox to make it reliably control DDU's control. (DCU 23)

c. Fixed problems setting time zones when the locale of the device differs from the locale of the DCU config file. (DCU 8)

d. Fixed the display of non-printing characters for "Label prefix," "Label suffix," and "Data separator." (DCU 51)

4. FILES

-   DCU_Setup_v4_1_3_0.exe: DCU Installer, version 4.1.3.0. This file is used to install Datalogic Configuration Utility (DCU) version 4.1.3.0.
-   ReleaseNote_DCU_4_1_3.pdf - this document.

5. Other notes

Upgrade method:

1. Uninstall any previous version of Datalogic Configuration Utility (DCU).

2. Double click the DCU_Setup_v4_1_3_0.exe and follow the on screen instructions to complete the installation.
