> Flip the cover open.

SD Cover

microSD Card Slot
SIM Card Slot

microSD card

> Slide the microSD door to the left to unlock it. Flip it open.
> Slide the microSD card onto the guides on the SD card door.
> Close the microSD door, and slide it to the right to lock it.

SIM card

> Slide the SIM card metal door latch to the right to unlock it. Flip it open.
> Slide the SIM card into the guides on the SIM card door.
> Close the SIM card door, and slide the metal door latch to the left to lock it.

GETTING STARTED

**1** **Insert the Battery**
2 **Snap the Battery into Place**

Press down firmly on both sides of the battery to ensure that it is securely seated in Omnii.
3 **Charge the Battery**

The power adaptor can be plugged into a snap module attached to Omnii.

Snap Module

The power adaptor can also be plugged into the desktop docking station.

Note: Use only the universal AC power adaptor and IEC320-C13 power cord approved by Psion for Omnii.
Allow the battery to charge for 3-4 hours.

0 - 40° C
32 - 104° F

Note: Full battery performance is only reached after the first few full charge/discharge cycles.

4 **Turn the Unit On**

Press and hold down the **ENTER/Power** key for at least one second.

ENTER/Power Key

5 **Connect Omnii to the PC**

Connect through a docking station or a snap module with a USB port.

6 **Install and Configure Data Transfer Software**

Use ActiveSync® (Windows® XP® or earlier) or Mobile Device Center® (Windows Vista® or Windows 7®) to establish a connection between Omnii and the PC and synchronize your e-mail, contacts, and so on.

For either ActiveSync or Mobile Device Center, go to the following website:

http://go.microsoft.com/fwlink/?LinkId=147001

7 **To Turn Omnii Off, Do One of the Following:**

> Press the **FN** key followed by the **ENTER/Power** key, or

> In the *Start* menu, choose **Shutdown>Suspend**.

RESETTING THE UNIT

⚠ **Important: Resetting may result in data loss.**

To perform a cold reset:

> Press the SYM key, the FN key, and the ENTER/Power key simultaneously for six seconds.

During a cold reset, running programs are halted and RAM memory is cleared. The contents of flash memory and the registry are preserved. The operating system is reloaded.

To perform a warm reset:

> Press the FN key and the ENTER/Power key simultaneously for a few seconds.

During a warm reset, running programs are halted. The contents of RAM, flash memory, and the registry are preserved.
