Getting Started

Scan this bar code with your smartphone or visit www.honeywellaidc.com/captuvoinstructions for a Getting Started video.

The Captuvo SL22 Enterprise Sled (Agency Model: SL-ES-C) used with the Apple® iPod touch® 5 mobile digital device and the Captuvo SL42 (Agency Model: SL-ES-C) used with the Apple iPhone® 5 include an optional integrated imager for scanning all types of bar codes. An optional magnetic stripe reader (MSR) for reading cards with magnetic stripes is also available for non-healthcare sleds.

Note: An imager is standard with the healthcare devices.

*Note: Honeywell is not an authorized Apple repair center. Please return **only** your sled to us for repair. Honeywell is not liable for any non-Honeywell product shipped to our repair center.*

Note: Refer to your Apple iPod touch and iPhone documentation for important product and safety information.

User Documentation

To download the sled documentation, visit www.honeywellaidc.com.

For more information about the sleds, visit www.honeywellaidc.com/captuvo/sl22.html.

Note: Due to the availability of different models, your sled may look slightly different from the illustrations included in this document.

Inserting the Battery

Ensure all components are dry prior to mating sleds/batteries with peripheral devices. Mating wet components may cause damage not covered by the warranty.

We recommend use of Honeywell Li-Ion battery packs. Use of any non-Honeywell battery may result in damage not covered by the warranty.

There is a danger of explosion if the batteries are incorrectly replaced. Replace the batteries with only the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the recycle program for batteries as directed by the governing agency for the country where the batteries are to be discarded.

Non-Healthcare Sled Battery (1150 mAh)

Healthcare Sled Battery (3340 mAh)

Installing the Apple Device into a Non-Healthcare Sled

1. For non-healthcare sleds, open the door by pushing the top **toward the front of the sled**.
2. Slide your device into the sled.

Note: Be careful that the connectors are not accidentally damaged.

Installing the Apple Device into a Healthcare Sled

1. For healthcare sleds, remove the four TORX (T6) screws on the back of the unit.

Note: If you are using an Apple iPhone 5c, carefully remove the adapter that is pre-installed in the sled. If you are using an Apple iPhone 5/5s, leave the adapter installed.

2. Place the Apple device into the sled and press the top and bottom housings together and tighten the four screws. Be certain not to over tighten the screws.

Non-Healthcare Sled Security Mechanism

Note: To reduce the risk of the Apple device being removed or disengaging from the non-healthcare sled, we recommend that you lock both of the security mechanisms.

Charging Using Wall Adapter

Note: If you use the wall adapter, both the sled and the iOS device charge.

Note: Use the adapter that came with the iPhone 5 packaging to charge the phone and the sled.

Charging using USB to PC

Note: When the iOS device is in the sled and it is connected to a PC/laptop, only the sled charges. The iOS device cannot be charged or updated via USB.

LED Indicators

Color	Indication
Blink Red	Sled's battery power is low (8% and below); needs charging.
Blink Green	Sled's battery is charging.
Solid Green	Sled battery is fully charged.

Demo Apps

To test scanning a bar code, download the Honeywell Price Check application from the Apple App StoreSM. This application is for demonstration purposes only and does not process any data.

Application Software

The sleds require special application software. Please refer to www.honeywellaidc.com/iosapps for information regarding software.

Reading Magnetic Stripe Cards

Healthcare Housing Cleaning Directions (Healthcare models only)

Important: The following cleaning solutions have been tested to assure safe cleaning of your sled's disinfectant-ready housing. They are the only solutions approved for use with this sled. Damage caused by the use of cleaners other than those listed below may not be covered by the warranty.

- Gentle dish soap and water
- 409® Glass and Surface Cleaner
- CaviWipes™
- Clorox® Bleach (10%)
- Isopropyl Alcohol Wipes (70%)
- Sani-Cloth® HB
- Sani-Cloth® Plus
- Super Sani-Cloth®
- Virex® 256
- Windex® Blue

Operating Temperature

The maximum operating temperature range for the sleds is 0°C to 35°C (32°F to 95°F).

Technical Assistance

Contact information for technical support, product service, and repair can be found at www.honeywellaidc.com.

Limited Warranty

Refer to www.honeywellaidc.com/warranty_information for your product's warranty information.

Patents
